

FROSTATION™

WATER MANAGEMENT SYSTEM WMS 510 FR0850

The Frostation Water Management System is used to provide clean water for the rinsing of tools used in the ice cream folding process. It consists of a 5 gal water dispenser, clear water feed hoses, water dispensing spigots, a rinse and utensil holding basin with drain and 10 gal water removal tote. The system is self contained in that it holds the fresh water, as well as the waste water.
